

TMS-2000 Architecture

The TMS-2000 delivers a new level of cinema management – with ease and ultra-high efficiency.

Technical Specifications

Hardware Requirements

- Windows 7, 8 and 8.1
- Windows Server 2008 R2 and 2012
- Intel® Core™ i3 Processor
- Minimum 2GB RAM
- Minimum Display Resolution 1366 x 768
- Minimum 1x LAN
- Internal HDD (Minimum 40GB for OS and TMS Software)
- Internal HDD or External HDD for Digital Cinema Content Storage (Typically 1TB)
- Mouse/Keyboard/Monitor

Recommendations

- Intel® Core™ i5/i7 Processor
- 4 GB RAM
- Wide Screen Display 1920 x 1080
- LAN1: 10/100 Ethernet Adaptor (Management)
- LAN2: 10/100/1000M Ethernet Adaptor (Content)
- Dedicated Storage Server with Multiple-Terabyte Capacity
- Optical Drive: DVD-ROM or Blu-ray
- CRU Drive (For faster ingest of content)
- eSATA (For faster ingest of content)
- USB 3.0
- Broadband Internet Connection (For online services such as KDM delivery, SNMP monitoring, content delivery, etc)

Language Versions

- English
- Simplified Chinese
- Traditional Chinese
- Korean
- Japanese
- Spanish
- Russian
- Thai
- Bahasa Indonesia

Third-party Software Applications

- PostgreSQL 8.3.1
- FileZilla FTP Server 0.9.27
- Net-SNMP 5.4.2
- TightVNC 2.7.10
- Web Browser Equivalent to Internet Explorer 6 or Later
- VPN Client (Optional)
- Growl v2.0.9 (Optional)

TMS-2000

Theatre Management System

Your comprehensive solution for centralized cineplex management

“ The GDC Theatre Management System (TMS) is the ultimate next generation theatre management solution giving you centralized control over the entire cineplex. Now with refined features and easier to use than ever, this digital cinema system automates and streamlines all theatre operations, making theatre management simple. ”

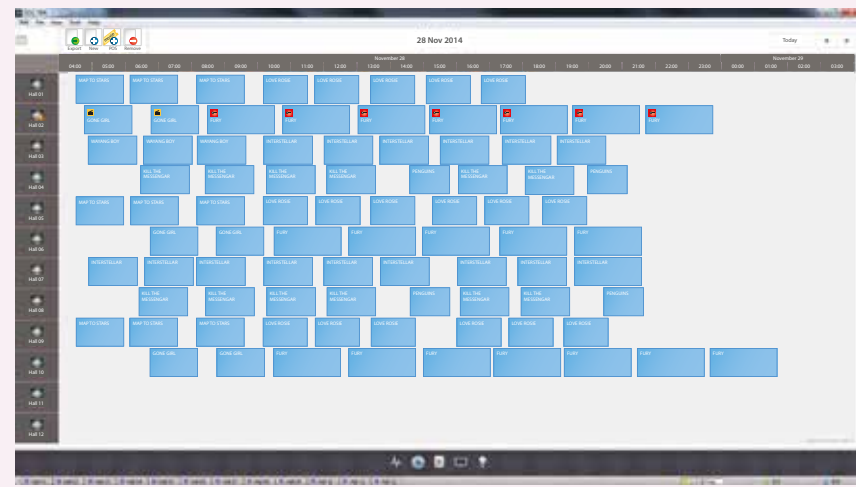

TMS-2000 Theatre Management System

Complete Compatibility

GDC's TMS-2000 is a flexible software solution that works with all major brands of digital cinema equipment. Unlike other TMS on the market, TMS-2000 is not bundled with any particular hardware, it runs on majority of Microsoft Windows platforms.

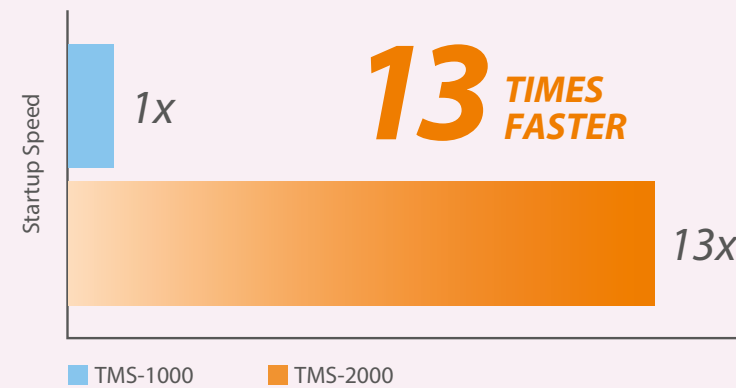

Schedule Shows at Your Convenience

The newly designed Show Scheduler lets you track and visualize all your scheduled shows for the day. Import your schedules from more than 25 pre-qualified POS. Add and delete them on your theatre screen with ease. Worried about scheduled shows not playing? A built-in alert automatically notifies you if there's an invalid KDM or missing CPL.

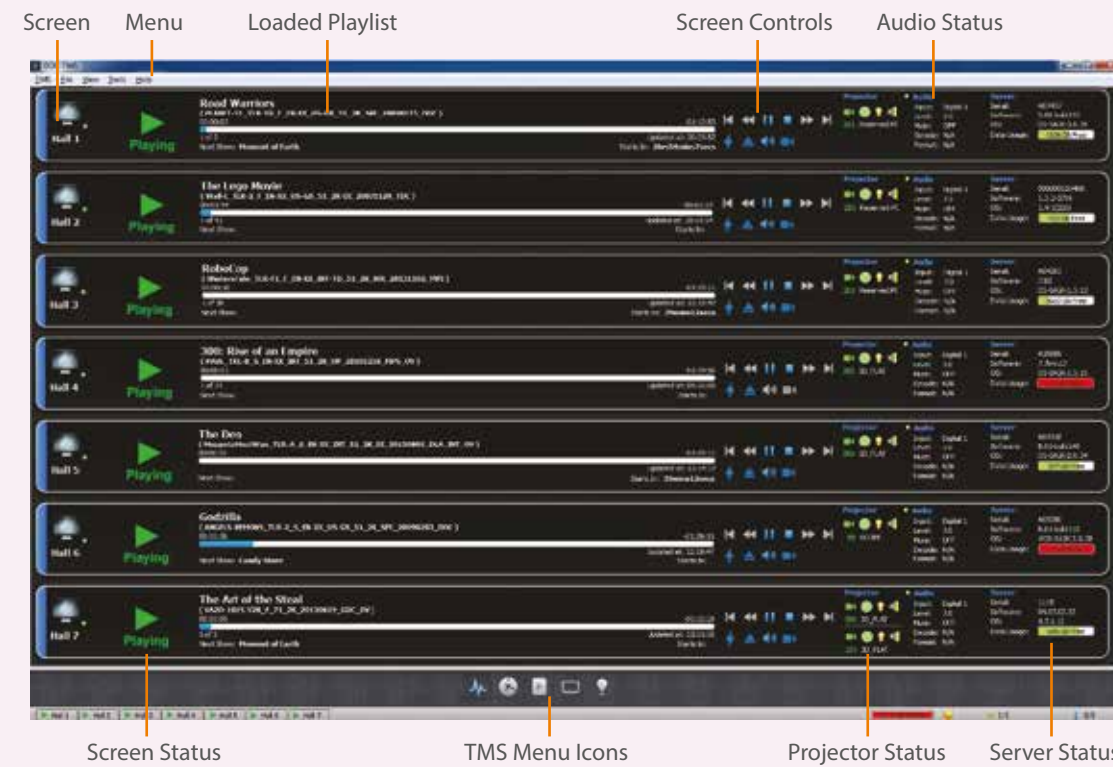

Faster and Better Performance

Comprehensively redesigned with useful features and optimizations to serve all your needs, the newly released TMS-2000 allows you to take control right away with a start-up time that's 13 times faster than TMS-1000. Your TMS experience has never been better.

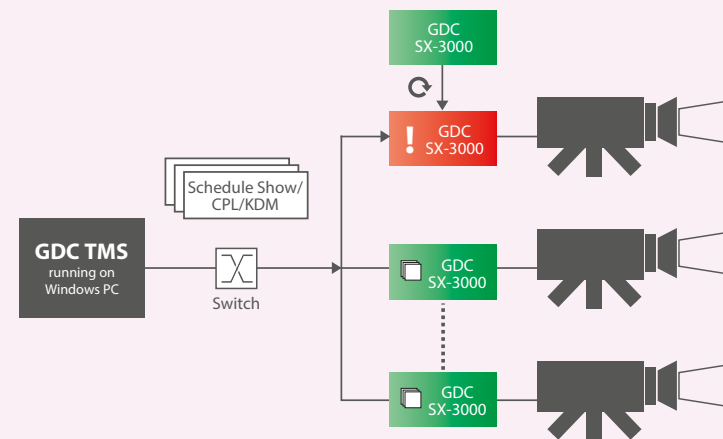

Monitor and Control Your Screens from A Single Access Point

Now you can monitor every aspect of your cinema screens at a glance. The status of both projector and audio device are displayed with real-time information while the Projector and Sound Processor Controller give you the control you need.

Restore Your Data in One Click

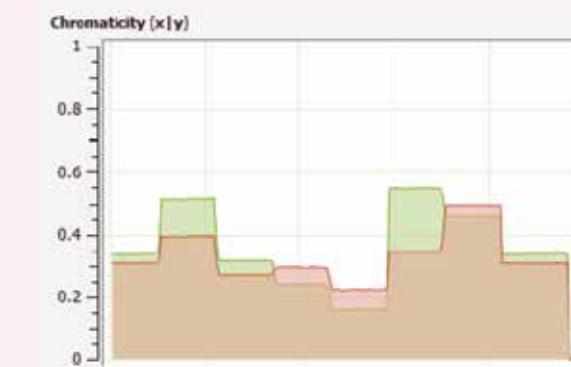

With SmartRestore, you can restore all your scheduled shows and relevant details in a click. This feature gets your GDC SX-3000 Standalone Integrated Media Block™ - powered screens up and running in no time.

TMS-2000 Optional Features

Centralized and Mobile

With TMS-2000, you can manage your cineplex from anywhere and remotely control your daily theatre operations from a PC, laptop or mobile devices.

Deliver an Unparalleled Cinematic Experience

The award-winning QualityManager feature brings you excellent value in ensuring the right level of projector brightness, crisp and vivid color, and crystal-clear audio free from distortion. You and your cinema patrons will love your best-in-class theatre.
